Oct 15, 2007 Convert User Interface Design to Adobe Flex or Adobe Flash. When you create an Adobe UI Flash timeline, your movie can include the Flash components as separate layers within the timeline. Drag and Drop Definition Panel. Types of Layouts Although there are a number of tools you can use to create Adobe Flash or Flex UIs, the main method for creating a UI is to use a library. Design Layout A design layout is a template for generating user interface elements. A design layout contains definitions for each of the elements that it will generate. In Adobe Flex, the elements can be categorized into the following four styles: labels, tool bars, buttons, and graphics. Layouts provide an easy way to create multiple components from a single template. Using the design layout, you can create a number of different components by copying and pasting the template into a new Flex project. Once the design layout is used to create a new Flash or Flex timeline, the design layout is no longer visible. If you no longer want to use the design layout, you can delete it from the Flex project or you can delete the timeline and the template. The design layout includes definitions for the different components. You can use a design layout to create multiple components by copying and pasting the design layout into a new Flex project. Adobe Flex 4 and above Adobe Flex 4 and later let you include images in a Flex 4 or later timeline. Adobe Flex 4 and later also include new visual designers for creating Flash UI components. In the Timeline interface, you can use the visual designer to create interactive graphics and interactive graphics for Flex 4 and later. Flash as the first UI for OS X Adobe Flash provides a rich set of UI controls and tools for creating Flash, Flex, and AIR applications. In addition to the timeline, Adobe Flash includes vector graphics tools for creating Flash UI components. You can create shapes and vector graphics for a Flash document by using the Flash authoring tools. File formats Adobe Flex Adobe Flex is a software development kit (SDK) that allows developers to create applications that run on different web browsers and mobile devices. Adobe Flash Adobe Flash is a software development kit (SDK)
