DesignDoll Crack + License Code & Keygen

This is a simple application, which allow you to record mouse movements on your keyboard, such as a left click, a right click, a double click, and so on. These keystrokes can be assigned to any program in your desktop or even to command line executables. KEYMACRO is specially useful if you use a GUI-based application, such as the Windows Desktop, as a shortcut for a mouse movement. That is to say, if you're a mouse user, you can record all the mouse movements with KEYMACRO and use these macros as a shortcut for various actions. The tool also has a very simple interface, which is good enough to be used by anyone. Features: ➡ You can record the keystrokes. ➡ You can assign keyboard commands to a program. ➡ You can even assign keyboard commands to a particular mouse click or double-click. ➡ You can assign keyboard commands for each device separately. ➡ You can even assign commands to all buttons on your keyboard. ➡ Keystrokes can be recorded in batches. ➡ You can save the recorded keystrokes on a text file. ➡ You can then open the text file from the program or even from the command line. ➡ It is also possible to play back the macros recorded. ➡ You can even show the commands in a pop-up window. ➡ You can even show which window the commands were recorded from. ➡ It is possible to add the recorded commands to the system's registry. ➡ You can play back the macro for 10 times and save it. ➡ You can assign macro titles. ➡ You can even assign a macro to any application. ➡ You can change the time interval at which macros are recorded. ➡

You can assign a custom keystroke to playback the recorded macro. ➡ You can also assign a macro to a hotkey. ➡ You can assign all macros to a keyboard shortcut. ➡ You can also assign a macro to a command line executable. ➡ You can also specify what device each command was recorded from. ➡ You can even assign custom commands to each device. ➡ You can 77a5ca646e
