With development in the late 1980's, higher definition and more functions in recording and reproducing audio and video signals were implemented in laser discs. Since the laser disc is a recording medium developed based on an information recording technology which has been established more than 40 years ago, it is expected to be the recording medium with the longest history in the current electronics industry. The laser disc is classified into a compact disc recordable (CD-R) and a compact disc re-recordable 3da54e8ca3
