Field of the Invention The present invention relates to an abnormality detecting method, which is used in a liquid ejection apparatus for a record and display apparatus, for example, for detecting whether or not an ink ejection mechanism malfunctions or the like, and to an ink jet printer. 2. Description of the Related Art In an ink jet printer which performs a recording operation by ejecting ink from a plurality of nozzles, there is a case where an ink ejection amount is insufficient due to a decrease in the amount of ink in an ink channel, which is used for conveying the ink from an ink tank to the nozzles, or a case where an air bubble is mixed into the ink. A state in which the amount of ink is not sufficient in this manner is called a shortage of ink. When the shortage of ink occurs, a trouble occurs in the ink jet printer, and there is a possibility that the shortage of ink may lead to degradation in the quality of the print and to the occurrence of abnormal discharge (see Japanese Patent Application Laid-Open No. 2009-149251, for example). As a technique for detecting a shortage of ink, there is a known technique in which an overflow of ink in a surplus tank which is disposed on the upstream side of a recording medium in a recording operation is detected, and the shortage of ink is detected based on the overflow of ink in the surplus tank (see Japanese Patent Application Laid-Open No. 2008-214054, for example). In a case where an overflow of ink occurs in the surplus tank, there is a possibility that the shortage of ink occurs in the ink tank (ink channel) in the

General ----- The Bible Converter provides support for more than 20 file formats for the Bible, including Amstrad, Borland, DigiFaith, FreeBible, G2, Haggadah, KJV1611, KJV1611-SMV, KJV1611-PDF, KJV-Etext-Italic, KJV-Etext-Modern, KJV1611-Etext-Italic, KJV-Etext-Modern, LG1612-PDF, LG1612-Etext-Modern, LG1612-Etext-Modern-PDF, LG1612-Italic, LG1612-Modern, LG1612-PDF, LG1612-Etext-Modern, LG1612-Etext-Modern-PDF, LG1613-PDF, LG1613-Etext-Modern, LG1613-Etext-Modern-PDF, Supported Bible Formats: Bible Format Format BFC WINDOWS SOFTWARE FOOTNOTES EPUB FCE Software DTD HTML XML XHTML SCE SCX YDL Bible Format - BFC The BFC (Bible Format Converter) is a Bibles encoding program. It is a program designed to convert a KJV1611, a KJV1611-PDF, a KJV1611-SMV, or a KJV1611-Etext-Italic file into HTML, XML, PDF, or other formats. To convert the Bible file to HTML, BFC requires that you save it as KJV1611.htm, KJV1611.xml, or KJV1611-PDF.htm. If you save it as KJV1611.htm, the BFC will automatically add the pages using Microsoft Word. Saving as KJV1611.xml will make the files compatible with the Document Creation Kit. If you save it as KJV1611-PDF.htm, BFC will convert the Bible to a PDF file. This Bible converter can convert directly from a file to an HTML, XML, or PDF document. However, if you would like to convert a multi-page text file into a Web page, it is required to place the pages into one separate HTML document and then convert the pages into a separate HTML file. The BFC does not contain the ability to convert multi-page text files. The application supports versions of the KJV1611 format. Version 1.1 of the KJV1611 format requires that all pages be saved into a file with an extension of "PDF". Version 2.0 requires that all pages be saved into a file with an extension of "HTML". You can specify the number of pages to save in the HTML, XML, PDF, or HTML document. You can also determine the size of the saved document. If you would like to
