Perfect Automation Portable

Perfect Automation Portable is a software tool that was developed in order to help people automate particular tasks that they have to repeat often. It is the portable counterpart of Perfect Automation and it is suitable for users that want to keep their operating system clean and untouched at all times. There are no Windows registry or Start menu leftovers and no leftovers to clean at all. After the successful installation, just copy the program files to an external storage device, such as a pen drive, and you are all set. Below you will find a list of features that we consider to be the most essential:

- Automate tasks as much as you want: you have the possibility to create new macros, edit an existing one, or schedule a time for its execution.
- Recording mouse and keyboard activity: perfect for analysts, researchers and developers.
- Import system dates: the scheduler can read the current day and the date from the desktop, Start menu, quick launch, custom directory and more.
- Hotkey: assign a single key combination to a macro and it will launch automatically.
- Settings: you can adjust the playback speed, define the number of attempts a macro can make before failing and you can also create a list of macros.
- Mini Automation: all your macros will be available here, just drag and drop them to the list and it will add it to the list of macros.
- Hide the interface: the interface will remain hidden until you launch it from the Start menu.
- Export your macros: you can export them to an executable file to transfer them to your friends.
- Ascan Builder: it allows you to build automation files, which will include different types of tasks that will be assigned automatically.
- Download Manager: this piece of software will be very useful in the future if you want to make multiple connections at once and speed up the process.
- No viruses detected, no technical issues detected
- The program is compatible with all versions of Windows XP, Windows Vista and Windows 7.

The Smallest Automation Tool: the software is no larger than 1.9 MB and will not consume system resources and it is fully compatible with all Windows operating systems. One of the most powerful automation programs: as of now, it has more than 30 different items in its catalogue
